

TINY MOTOR CARS

I wasn't into you
I couldn't stand the truth
I was running from the pain
How did you know my name?
And new just what to say
And somehow made a way
For this love, for this love

**Lying next to you
I never realized
I'd never seen the sky
Under the trees
Just staring through the leaves
With you looking back at me**

So broke you couldn't sing
A broken set of strings
Like a broken diamond ring
You broke your favorite thing
And you intended to
Crush and follow through
For the love, for the love

**Lying next to you
I never realized
I'd never seen the sky
Under the trees
Just staring through the leaves
With you looking back at me**

I'm wondering, how did you find me
Pondering, where do we go from here

**Lying next to you
I never realized
I'd never seen the sky
Under the trees
Just staring through the leaves
With you looking back at me**

**Mmm next to you
I never realized
You took me up so high
See the tiny motor cars
Bumping into stars
Looking with my heart**
